ENGINEERING AND TECHNOLOGY DEGREES

1979

PART I - BY SCHOOL

Summary data by School, Curriculum Group, and Degree Level

ENGINEERING MANPOWER COMMISSION
of ENGINEERS JOINT COUNCIL

(C) Engineers Joint Council 1979

November 1979

ENGINEERS JOINT COUNCIL

ENGINEERS JOINT COUNCIL (founded in 1941 and incorporated in 1958) is a federation of engineering societies whose general objective is to advance the art and science of engineering in the public interest.

In furtherance of this general objective the Council shall:

(a) Provide for regular and orderly communications among its member societies.

(b) Act as an advisory and coordinating agency for member society activities, as mutually agreed.

(c) Organize and conduct forums for the consideration of problems of expressed concern to member societies.

(d) Identify needs and opportunities for service in the engineering community and inform the concerned engineering institutions.

(e) Recommend appropriate programs of studies and research to engineering institutions and especially to member societies.

(f) Undertake, in accordance with policies mutually agreed to, specific activities or projects that the member societies acting individually could not accomplish as well.

(g) Represent the member societies when they deem such joint representation desirable.

THE ENGINEERING MANPOWER COMMISSION of ENGINEERS JOINT COUNCIL

The Engineering Manpower Commission was organized in 1950 as part of Engineers Joint Council, to serve as a focus for national technological manpower problems.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

"To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Board of Directors of EJC."

EMC OFFICERS AND STAFF

Richard C. Fremon	Chairman
Kenneth E. Brooker	Vice-Chairman
Luke Noggle	Chairman, Surveys Committee
Patrick J. Sheridan	Manager, Manpower Activities
Pamela Mazer	Assistant, Manpower Activities
Rosanna Bonadonna	Secretary

ACKNOWLEDGMENT

The Engineering Manpower Commission is pleased to recognize the invaluable assistance of Dr. Frank Stacy, Richard Hamalak and others in the E. I. DuPont de Nemours and Co., in developing the computer program and in processing the data for this survey. We appreciate the cooperation of the hundreds of deans and college officials who provided the data on which this report is based. This survey was conducted by Pamela Mazer, Administrative Assistant on the Engineering Manpower Commission staff, under the overall direction of Patrick J. Sheridan, Manager of Manpower Activities. Donald E. Irwin is consultant to the Engineering Manpower Commission staff.

INTRODUCTION

Following the format established in 1976, this report on Engineering and Technology degrees awarded in 1979 again presents the data in three parts. Each of the three parts focuses on a different aspect of the engineering and technology degree data and is designed to present the statistics in the most useful and convenient format.

Part I, 56 pages, consists of degree data for each school arranged in tabular form with columns for the 21 most prominent curriculum groups, totals for the school, and information on each school's accreditation and control status. There are separate tables for each of four degree levels in engineering, four in engineering technology, and four in industrial technology. At the end of each table are summaries of the number of special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), Women, and Foreign Nationals included in the totals for each degree level. These data are useful to educators in planning curricula, and as an aid in career counseling. These summaries are useful to employers as the most complete source of data on engineering and technology programs and degrees.

Part II consists of 135 pages of detailed data broken down into each of six special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), Women, and Foreign National students presented in the same format as Part I. Prior to 1976, such degree data was not available for both engineering and technology. Part II should be useful to business and industry employers in planning affirmative action programs to meet recruiting goals for minorities and women, and to all individuals who are concerned with the progress of the national effort to increase participation of minorities and women in engineering.

Part III focuses on curricula in greater detail than the other parts. Each of 29 different engineering or technology curricula groups is listed in order, giving the schools offering such programs, number of degrees awarded at each degree level, and the number of special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), Women and Foreign Nationals graduated from each school. Engineers' Council for Professional Development accreditation for specific curricula is designated for each curricula. A final set of tables summarize degrees at all levels of engineering and technology according to the detailed curriculum titles. Part III, 94 pages in length, enables users to find data on programs, affirmative action planning, etc.

For the convenience of users, these parts of Engineering and Technology Degrees-1979 are available separately or as a set. A separate report on Engineering and Technology Enrollments is scheduled to be off the press during February 1980. Orders may be placed with the Publications Department, Engineers Joint Council, 345 East 47th Street, New York, New York 10017.

PART I

This part of the report provides data on the number of engineering and technology degrees, as reported to the Engineering Manpower Commission of Engineers Joint Council, for the school year ending in June 1979. Tables appear for the following degree levels:

- Engineering Degrees
  - Bachelor's
  - Master's
  - Engineer (Professional)
  - Doctor's

- Engineering Technology Degrees
  - Certificate - 2 year
  - Associate
  - Bachelor's
  - Master's (none reported)

- Industrial Technology Degrees
  - Certificate - 2 year
  - Associate
  - Bachelor's
  - Master's

The engineering tables include data from 288 schools known by EMC to offer engineering degrees at the bachelor's level or higher. The data are essentially complete for all engineering schools in the U.S. In some cases curricula have been grouped under generic headings, as described later, rather than under the title reported by the school as only twenty-one curricula categories are available for reporting purposes.

The engineering technology and industrial technology tables show data for selected schools, including all schools on the ECPD accreditation lists for 1978. Data are presented in twenty-one curricula categories.

Unlike the totals for engineering degrees, the technology degree totals do not represent national totals because they include only selected schools responding to the survey. There is no way of knowing how many additional degrees may have been awarded by other schools. The 1979 technology degree data are not directly comparable to previous years' surveys because of variations in the schools responding each year.

Following the totals for each degree level, data for the six special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), Women and Foreign Nationals, are summarized for the twenty-one curricula categories. Complete data supporting this summary information are provided in Part II, while Part III gives more detailed information by curricula conveniently grouped under twenty-nine descriptive headings.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Column 1 - School. Schools are listed alphabetically by state, followed by a total for that state.

Column 2 Accreditation and Control (AC). The first digit is an accreditation code with the following meaning:

1	At least one engineering curriculum accredited by ECPD (1978 list). Used only in the engineering degree tables.
2	At least one technology curriculum accredited by ECPD (1978 list). Used only in the technology degree tables.
4	Accredited by a regional accrediting commission (1977-78 list).
5	Accredited by NATTS (1975-76 list).
6	None of the above.

The second digit indicates control of the school according to the following code:

1	Public - state or local government control
2	Public - federal government control
3	Private - nonprofit, nonsectarian
4	Private - religious
5	Private - proprietary

The remaining columns give the number of degrees awarded by each school, by major curriculum group, as follows:

Engineering Degree Categories

AER	Aerospace, Aeronautical, Astronautical
AGR	Agricultural, Forest
ARC	Architectural
BIO	Bioengineering, Biomedical
CER	Ceramic
CHE	Chemical & related
CMP	Computer Science or Engineering & related
CVL	Civil, Construction, Structural, Transportation & related
ELC	Electrical, Electronic, Electrical Power, Communications, Electromechanics
ENS	Engineering or Applied Science, Mathematics, Mechanics, or Physics
ENV	Environmental, Sanitary, Atmospheric Sciences, Water Resources, etc.
GNL	General, Engineering Economic Systems, Interdisciplinary, etc.
INM	Industrial, Human Factors, Manufacturing & related
MAR	Marine, Naval Architecture, Ocean, etc.
MEC	Mechanical, Automotive and related
MGN	Mining, Mineral, Geological
MTL	Materials Science or Engineering, Metallurgical, Welding
NUC	Nuclear
PET	Petroleum, Gas
OTH	Other
SYS	Systems, Operations Research, Systems Science

Engineering Technology and Industrial Technology Degree Categories

ACN	Air Conditioning & related
AER	Aircraft & related
ARC	Architectural
AUT	Automotive, Diesel, Internal Combustion, etc.
CHE	Chemical
CIV	Civil, Highway, Surveying, Transporation, etc.
CON	Construction and Structural
CMP	Computer, Data Processing, etc.
DRF	Drafting, Design, Graphics
ELE	Electrical, Power Distribution
ELM	Electromechanical, Instrumentation
ELX	Electronic, Communications, Radio, TV, etc.
ENS	Engineering Science, Laboratory Technology (includes 2-year pre-engrg)
GEN	Engineering Technology, Technology--General
INT	Industrial Technology, Manufacturing, Quality Control, Systems
MAR	Marine, Marine Construction, Nautical Technology, etc.
MCH	Mechanical
MNP	Mining, Mineral, Petroleum
MTR	Materials, Metallurgical and Welding
NUC	Nuclear, Radiation
OTR	Other Technology, i.e., Water Resources, Environmental, Forest, Agricultural, etc.

ESTIMATED DATA

Information was not received from the following engineering schools at the time of publication. In order to present reasonable comparative data to previous reports, information from the 1978 report has been substituted for these institutions:

Arkansas Polytechnic College
California Poly San Luis Obispo
Maine Maritime Academy
University of Michigan
University of New Orleans
Philadelphia College Textiles
Washington & Lee University
Western States College of Engineering

In a few cases, schools estimated their minority data. These data are denoted by an asterix (*) in the minority total column.

ENGINEERING MANPOWER COMMISSION

of ENGINEERS JOINT COUNCIL

(C) Engineers Joint Council

November 1979

ENGINEERS JOINT COUNCIL

ENGINEERS JOINT COUNCIL (founded in 1941 and incorporated in 1958) is a federation of engineering societies whose general objective is to advance the art and science of engineering in the public interest.

In furtherance of this general objective the Council shall:

(a) Provide for regular and orderly communications among its member societies.

(b) Act as an advisory and coordinating agency for member society activities, as mutually agreed.

(c) Organize and conduct forums for the consideration of problems of expressed concern to member societies.

(d) Identify needs and opportunities for service in the engineering community and inform the concerned engineering institutions.

(e) Recommend appropriate programs of studies and research to engineering institutions and especially to member societies.

(f) Undertake, in accordance with policies mutually agreed to, specific activities or projects that the member societies acting individually could not accomplish as well.

(g) Represent the member societies when they deem such joint representation desirable.

THE ENGINEERING MANPOWER COMMISSION

of ENGINEERS JOINT COUNCIL

The Engineering Manpower Commission was organized in 1950 as part of Engineers Joint Council, to serve as a focus for national technological manpower problems.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

"To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Board of Directors of EJC."

EMC OFFICERS AND STAFF

Richard C. Fremon	Chairman
Kenneth E. Brooker	Vice-Chairman
Luke Noggle	Chairman, Surveys Committee
Patrick J. Sheridan	Manager, Manpower Activities
Pamela Mazer	Assistant, Manpower Activities
Rosanna Bonadonna	Secretary

ACKNOWLEDGMENT

The Engineering Manpower Commission is pleased to recognize the invaluable assistance of Dr. Frank Stacy, Richard Hamalak and others in the E. I. DuPont de Nemours and Co., in developing the computer program and in processing the data for this survey. We appreciate the cooperation of the hundreds of deans and college officials who provided the data on which this report is based. This survey was conducted by Pamela Mazer, Administrative Assistant on the Engineering Manpower Commission staff, under the overall direction of Patrick J. Sheridan, Manager of Manpower Activities. Donald E. Irwin is consultant to the Engineering Manpower Commission staff.

INTRODUCTION

Following the format established in 1976, this report on Engineering and Technology degrees awarded in 1979 again presents the data in three parts. Each of the three parts focuses on a different aspect of the engineering and technology degree data and is designed to present the statistics in the most useful and convenient format.

Part I, 56 pages, consists of degree data for each school arranged in tabular form with columns for the 21 most prominent curriculum groups, totals for the school, and information on each school's accreditation and control status. There are separate tables for each of four degree levels in engineering, four in engineering technology, and four in industrial technology. At the end of each table are summaries of the number of special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), Women, and Foreign Nationals included in the totals for each degree level. These data are useful to educators in planning curricula, and as an aid in career counseling. These summaries are useful to employers as the most complete source of data on engineering and technology programs and degrees.

Part II consists of 135 pages of detailed data broken down into each of six special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), Women, and Foreign National students presented in the same format as Part I. Prior to 1976, such degree data was not available for both engineering and technology. Part II should be useful to business and industry employers in planning affirmative action programs to meet recruiting goals for minorities and women, and to all individuals who are concerned with the progress of the national effort to increase participation of minorities and women in engineering.

Part III focuses on curricula in greater detail than the other parts. Each of 29 different engineering or technology curricula groups is listed in order, giving the schools offering such programs, number of degrees awarded at each degree level, and the number of special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), Women and Foreign Nationals graduated from each school. Engineers' Council for Professional Development accreditation for specific curricula is designated for each curricula. A final set of tables summarize degrees at all levels of engineering and technology according to the detailed curriculum titles. Part III, 94 pages in length, enables users to find data on programs, affirmative action planning, etc.

For the convenience of users, these parts of Engineering and Technology Degrees-1979 are available separately or as a set. A separate report on Engineering and Technology Enrollments is scheduled to be off the press during February 1980. Orders may be placed with the Publications Department, Engineers Joint Council, 345 East 47th Street, New York, New York 10017.

PART II

Following the same format as in Part I, this part of the report gives details of data on engineering and technology degrees received by members of the six special categories of students.

Tables appear for each of the following six special categories of students: The four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), Women and Foreign Nationals, for the following degree levels:

- Engineering Degrees
  - Bachelor's
  - Master's
  - Engineer (Professional)
  - Doctor's

- Engineering Technology Degrees
  - Certificate - 2 year
  - Associate
  - Bachelor's
  - Master's (none reported)

- Industrial Technology Degrees
  - Certificate - 2 year
  - Associate
  - Bachelor's
  - Master's

The engineering tables include data from 288 schools known by the EMC to offer engineering degrees at the bachelor's level or higher. The data are essentially complete for all engineering schools in the U.S. In some cases curricula have been grouped under generic headings, as described later, rather than under the title reported by the school. Data are presented in twenty-one curricula categories.

The engineering technology and industrial technology tables show data for selected schools, including all schools on the ECPD accreditation lists for 1978. Data are presented in twenty-one curricula categories.

Unlike the totals for engineering degrees, the technology degrees totals do not present national totals because they include only selected schools responding to the survey. There is no way of knowing how many additional degrees may have been awarded by other schools. The 1979 technology degree data are not directly comparable to previous years' surveys because of variations in the schools responding each year.

Part I of this report presents summary data by school, curriculum, and degree level, while Part III gives more detailed information by curricula grouped conveniently under twenty-nine descriptive headings.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Column 1 - School. Schools are listed alphabetically by state, followed by a total for that state.

Column 2 Accreditation and Control (AC). The first digit is an accreditation code with the following meaning:

1	At least one engineering curriculum accredited by ECPD (1978 list). Used only in the engineering degree tables.
2	At least one technology curriculum accredited by ECPD (1978 list). Used only in the technology degree tables.
4	Accredited by a regional accrediting commission (1977-78 list).
5	Accredited by NATTS (1975-76 list).
6	None of the above.

The second digit indicates control of the school according to the following code:

1	Public - state or local government control
2	Public - federal government control
3	Private - nonprofit, nonsectarian
4	Private - religious
5	Private - proprietary

The remaining columns give the number of degrees awarded by each school, by major curriculum group, as follows:

Engineering Degree Categories

AER	Aerospace, Aeronautical, Astronautical
AGR	Agricultural, Forest
ARC	Architectural
BIO	Bioengineering, Biomedical
CER	Ceramic
CHE	Chemical & related
CMP	Computer Science or Engineering & related
CVL	Civil, Construction, Structural, Transportation & related

Detailed Data by Curriculum Title and Accreditation

ENGINEERING MANPOWER COMMISSION
of ENGINEERS JOINT COUNCIL

Engineers Joint Council 1979

November 1979

ENGINEERS JOINT COUNCIL

ENGINEERS JOINT COUNCIL (founded in 1941 and incorporated in 1958) is a federation of engineering societies whose general objective is to advance the art and science of engineering in the public interest.

In furtherance of this general objective the Council shall:

(a) Provide for regular and orderly communications among its member societies.

(b) Act as an advisory and coordinating agency for member society activities, as mutually agreed.

(c) Organize and conduct forums for the consideration of problems of expressed concern to member societies.

(d) Identify needs and opportunities for service in the engineering community and inform the concerned engineering institutions.

(e) Recommend appropriate programs of studies and research to engineering institutions and especially to member societies.

(f) Undertake, in accordance with policies mutually agreed to, specific activities or projects that the member societies acting individually could not accomplish as well.

(g) Represent the member societies when they deem such joint representation desirable.

THE ENGINEERING MANPOWER COMMISSION
# of ENGINEERS JOINT COUNCIL

The Engineering Manpower Commission was organized in 1950 as part of Engineers Joint Council, to serve as a focus for national technological manpower problems.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

> "To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Board of Directors of EJC."

EMC OFFICERS AND STAFF

Richard C. Fremon	Chairman
Kenneth E. Brooker	Vice-Chairman
Luke Noggle	Chairman, Surveys Committee
Patrick J. Sheridan	Manager, Manpower Activities
Pamela Mazer	Assistant, Manpower Activities
Rosanna Bonadonna	Secretary

ACKNOWLEDGMENT

The Engineering Manpower Commission is pleased to recognize the invaluable assistance of Dr. Frank Stacy, Richard Hamalak and others in the E. I. DuPont de Nemours and Co., in developing the computer program and in processing the data for this survey. We appreciate the cooperation of the hundreds of deans and college officials who provided the data on which this report is based. This survey was conducted by Pamela Mazer, Administrative Assistant on the Engineering Manpower Commission staff, under the overall direction of Patrick J. Sheridan, Manager of Manpower Activities. Donald E. Irwin is consultant to the Engineering Manpower Commission staff.

Engineering Curricula by School--1978-79	7
Technology Curricula by School--1978-79	47
Engineering, Engineering Technology and Industrial Technology Curricula by Degree	81

INTRODUCTION

Following the format established in 1976, this report on Engineering and Technology degrees awarded in 1979 again presents the data in three parts. Each of the three parts focuses on a different aspect of the engineering and technology degree data and is designed to present the statistics in the most useful and convenient format.

Part I, 56 pages, consists of degree data for each school arranged in tabular form with columns for the 21 most prominent curriculum groups, totals for the school, and information on each school's accreditation and control status. There are separate tables for each of four degree levels in engineering, four in engineering technology, and four in industrial technology. At the end of each table are summaries of the number of special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), Women, and Foreign Nationals included in the totals for each degree level. These data are useful to educators in planning curricula, and as an aid in career counseling. These summaries are useful to employers as the most complete source of data on engineering and technology programs and degrees.

Part II consists of 135 pages of detailed data broken down into each of six special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), Women, and Foreign National students presented in the same format as Part I. Prior to 1976, such degree data was not available for both engineering and technology. Part II should be useful to business and industry employers in planning affirmative action programs to meet recruiting goals for minorities and women, and to all individuals who are concerned with the progress of the national effort to increase participation of minorities and women in engineering.

Part III focuses on curricula in greater detail than the other parts. Each of 29 different engineering or technology curricula groups is listed in order, giving the schools offering such programs, number of degrees awarded at each degree level, and the number of special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), Women and Foreign Nationals graduated from each school. Engineers' Council for Professional Development accreditation for specific curricula is designated for each curricula. A final set of tables summarize degrees at all levels of engineering and technology according to the detailed curriculum titles. Part III, 94 pages in length, enables users to find data on programs, affirmative action planning, etc.

For the convenience of users, these parts of Engineering and Technology Degrees-1979 are available separately or as a set. A separate report on Engineering and Technology Enrollments is scheduled to be off the press during February 1980. Orders may be placed with the Publications Department, Engineers Joint Council, 345 East 47th Street, New York, New York 10017.

PART III

This part of the report presents the 1979 degree data grouped under more detailed curricula headings than Parts I and II. Taking each of 29 different curricula in turn, the tables list all schools reporting degrees in that field, the number of degrees awarded at each level, and the number received by six special categories of students, i.e., Women, Black, Hispanic, Asian/Pacific, American Indian, and Foreign Nationals. The curricula titles for the first time include the exact title provided by each school. This allows for specific or specialized reporting of programs. The tables also indicate those curricula that are accredited by the Engineers' Council for Professional Development according to the following codes: B = accredited at bachelor's degree level, M = master's degree level, A = associate degree level. The accredited designation is now complete for all the curricula. In a few cases both accredited and unaccredited curricula are shown for the same school. This information is provided only for the convenience of the user. The current list of accredited curricula published by ECPD should be consulted for the definitive status of any particular program.

Membership of the ENGINEERS JOINT COUNCIL

MEMBER SOCIETIES

ASCE	American Society of Civil Engineers
AIME	American Institute of Mining, Metallurgical and Petroleum Engineers
ASME	American Society of Mechanical Engineers
ASAE	American Society of Agricultural Engineers
SME	Society of Manufacturing Engineers
ASQC	American Society for Quality Control
AIIE	American Institute of Industrial Engineers
SFPE	Society of Fire Protection Engineers
AIPE	American Institute of Plant Engineers
AACE	American Association of Cost Engineers
AIChE	American Institute of Chemical Engineers
NICE	National Institute of Ceramic Engineers
ASEE	American Society for Engineering Education

ASSOCIATE SOCIETIES

APCA	Air Pollution Control Association
SPHE	Society of Packaging and Handling Engineers
IMMS	International Material Management Society
SWE	Society of Women Engineers
WSE	Western Society of Engineers
LES	Louisiana Engineering Society
WSE DC	Washington Society of Engineers
ESNE	Engineering Societies of New England
IMMS/NJ	International Material Management Society (New Jersey Chapter)
CES	Cleveland Engineering Society
SAME	Society of American Military Engineers
SAWE	Society of Allied Weight Engineers
DEC	Danville Engineers Club
ACEC	American Consulting Engineers Council
NACE	National Association of Corrosion Engineers
ASGE	American Society of Gas Engineers
SES	Standards Engineers Society
SESA	Society for Experimental Stress Analysis
ESD	Engineering Society of Detroit
